READING

The English Language

The study of foreign languages is very important. As for me I am very fond of English. I love everything in English: pronunciation, intonation, songs and poems.

More people on our planet speak English than any other language. English is the official language of the UK, Ireland, Australia, New Zealand, the USA, Canada and many other countries of Africa and Asia.

A lot of people believe that the English language is one of the richest languages of the world and has as many as about a million words.

The English language started on the basis of dialects of Angels and Saxons, who invaded the British Isles in the 5th century. Hundreds of French words came into English. Many new words were brought by traders and travellers.

Nowadays English is the language of science, education, medicine, literature, sport, business and music. English today is absolutely necessary for every educated person, for every good specialist.
